Edu-Therapy™ is a Cognitive Behavioral Process for healing grieving hearts due to:

Colonization · Residential Schools · Intergenerational Loss and Trauma
Loss of Family, Parents, Siblings, Children & Friends

You will learn:

- Dysfunctional ways people mishandle grief and the intergenerational effect on Communities
- Emotional damage of rationalization and intellectualization
- Education, awareness, and action with unique experiential exercises to create a training experience that is both educational and personally rewarding
- Why Denial, Anger, Bargaining, Depression & Acceptance Models are the wrong approach
- Effective and proper techniques for identifying and resolving loss and relationship conflicts
- Edu-Therapy™ Process formats for individual and group work
- How to expand your caregiving agency using Edu-Therapy™
- How to resolve cumulative unresolved issues, such as Post Traumatic Syndrome, the Residential School Experience, abuse and trauma, etc.
- How to deal with what is known, and what is not known - when a loved one goes missing (Ambiguous Loss)

"I registered for the training for professional development, and to acquire some continuing education credits - but that's not all I got... I just got up from the kitchen table, having had the first conversation with my teenage daughter in years that didn't start or end in conflict. This one ended with a hug, a few tears, and my daughter said 'Thanks for listening'. She was so right - I haven't been hearing her for years."
