

Edu-Therapy™ Solutions Healing Your Heart

***Building Sustainable Mental Wellness
Through Integrated Treatment and Training
A Cognitive Behavioral Model of Grief Resolution***

Edu-Therapy™ in First Nations, Métis and Inuit Communities

Grief and possible traumas negatively effect our lives. Coming in waves, they have a cumulative effect that, if not acknowledged and treated, inhibits our ability to integrate in healthy ways and will continue to repeat themselves.

Physical reactions include:

- ◆ Numbness
- ◆ Separation
- ◆ Disengagement
- ◆ Hyperactivity
- ◆ Removal

Communities prepared with the *Edu-Therapy™ Process* are stronger and more resilient. We are all stakeholders of the collective grief and trauma experience. The *Edu-Therapy™ Process* creates a safe place to acknowledge, accept and integrate pain resolution processes – creating resiliency and long term healing.
