# Edu-Therapy™ Solutions HEALING YOUR HEART

## Edu-Therapy™ in First Nations, Métis and Inuit Communities

Building Sustainable  
Mental Wellness  
Through Integrated  
Treatment and Training

A Cognitive Behavioral  
Model of Grief Resolution

**EDU-THERAPY™**  
building sustainable mental wellness

Grief and possible traumas negatively effect our lives. Coming in waves, they have a cumulative effect that, if not acknowledged and treated, inhibits our ability to integrate in healthy ways and will continue to repeat themselves. Physical reactions include:

- Separation      • Disengagement
- Numbness      • Hyperactivity

Communities prepared with the Edu-Therapy™ Process are stronger and more resilient. We are all stakeholders of the collective grief and trauma experience. The Edu-Therapy™ Process creates a safe place to acknowledge, accept and integrate pain resolution processes - creating resiliency and long term healing.

Once Certified as an Edu-Therapy™ Specialist, in as little as 6 hours per week, one specialist can bring mental resolution of the pain and sadness caused by loss to over 200 people per year. Trained teams can escalate these numbers, adding to the overall resiliency.
